LAW 4399

Institutional framework for establishing Private Investment Aid schemes for the country's regional and economic development - Establishing the Development Council and other provisions.

THE PRESIDENT
OF THE HELLENIC REPUBLIC

We issue the following law that was passed by Parliament:

SECTION A INSTITUTIONAL FRAMEWORK FOR ESTABLISHING PRIVATE INVESTMENT AID SCHEMES FOR THE COUNTRY'S REGIONAL AND ECONOMIC DEVELOPMENT

Article 1 Purpose

The purpose of this law is to promote the balanced development with respect to the environmental resources and support the country's less favoured areas, increase employment, improve cooperation and increase the average size of undertakings, achieve technological upgrading, form a new extrovert national identity (branding), improve competitiveness in high value-added and knowledge-intensive sectors, shift the value in the production chain for the production of more complex products, save natural resources in the perspective of a circular economy, offer better services, attract direct foreign investments and, ultimately, ensure better positioning of the country in the International Division of Labour. The achievement of these objectives is pursued by the aids hereof through the schemes provided for in the Special Part hereof, namely by:

(a) openness and innovativeness; (b) creating new jobs;
(c) developing the country's human resources with an emphasis on the employment of trained human resources to reverse the current exodus of young scientists;

(d) attracting direct foreign investments; (e) high added value; (f) improving the technological level and the competitiveness of enterprises; (g) smart specialisation;
(h) developing networks, synergies, cooperative initiatives and generally supporting the social and solidarity economy;
(i) encouraging mergers; (j) developing sections and interventions to enhance healthy and targeted entrepreneurship with a special emphasis on small and medium entrepreneurship;
(k) re-industrialisation of the country; (l) supporting areas with reduced growth potential and reducing regional disparities.

Article 2 Definitions

For the purposes hereof, in addition to the definitions contained therein, the definitions of Article 2 of the General Block Exemption Regulation shall apply (GBER - Regulation 651/2014 of the Commission).

Article 3 Applicable Law

1. The aids for the aid schemes hereof shall be provided without prejudice to the provisions of the GBER. The provisions of the above Regulation shall apply to all matters not expressly regulated in this law.

2. The aid schemes hereof, for which resources of the European Structural and Investment Funds are also used, shall be subject to the additional terms and conditions of the EU and national law governing such aids.

3. This law may also apply to investment projects for aids granted under schemes covered in other rules of EU law, after prior notification and approval process by the European Commission. Specific matters, and any differences arising from the application of the relevant EU rules shall be defined by decisions of the Minister of Economy, Development and Tourism, or any other competent Minister.

GENERAL PART COMMON PROVISIONS

CHAPTER I TERMS AND CONDITIONS OF AID

Article 4 General rules for granting aid

The aid schemes hereof are subject to the following general rules:

1. Single Investment Project (Article 14 para. 13 first sentence GBER)

For the purpose of applying the aid scheme hereof, it shall be deemed that a single investment project is also any initial investment started by the same beneficiary (at group level) including affiliated or associated undertakings, starting within three (3) years from the date of commencement of works for another aided investment in the same region (Nuts 3) of Regulation (EC) 1059/2003 of the European Parliament and of the Council (OJ L 154).

2. Cumulation

(a) Investment projects aided under the schemes hereof shall not be included in any other de minimis aid scheme or schemes. Exceptionally, the decision of notice regarding the schemes hereof may provide for the possibility of cumulating the aids under this scheme with the aids of other schemes, only if such cumulation does not result in exceeding the highest aid intensity or aid amounts specified in the GBER or the relevant Commission Decision (Article 8 para. 3, 4 and 5 GBER).

(b) In determining whether the thresholds on maximum aid intensities and maximum aid amounts provided for in the GBER for the schemes hereof are complied with, the total amount of aids provided, as appropriate, for the aided investment project or undertaking shall be taken into account, and the case of artificial splitting up shall be checked (Article 4 para. 2 and Article 8 para. 1 GBER).

(c) In cases of aid combination of the aids hereof with EU funding, which is subject to centralised management by the institutions, organisations, joint ventures or other EU bodies and not under the direct or indirect control of the State, the provisions of Article 8 para. 2 GBER shall apply.

3. The "Deggendorf" principle

Projects of entities that are subject to a pending recovery order after a previous Commission decision declaring an aid illegal and incompatible with the internal market shall not be included in the aid schemes hereof (Article 1 para. 4 GBER). Every investor, when submitting the application for inclusion in this law, must declare that it has not received any State aid against which the procedure of the previous section has been initiated.

4. Incentive Effect

The aids of the schemes hereof operate as an incentive within the meaning of Article 6 GBER, for the further development of activities or works and are not provided for activities, which the beneficiary would in any case develop, even without being granted the aid. The aids shall have an incentive effect, only if the beneficiary has submitted a written application for the aid before the start of the works on the project. The application for the aid shall contain at least the following information: (a) the undertaking's name and size; (b) description of the project, including its start and end dates; (c) the location of the project; (d) the list of project costs; (e) the type and amount of aid, and (f) the funding of the investment project.

Start of works is the earlier of either the start of construction works relating to the investment, or the first legally binding commitment to order equipment or any other commitment that makes the investment irreversible. Buying

land and preparatory works such as obtaining permits and conducting feasibility studies are not considered start of works. For take-overs, "start of works" means the moment of acquiring the assets directly linked to the acquired establishment (Article 2 point (23) GBER). The start of works of the investment project before requesting the aid results in the rejection of the entire investment project.

5. Rule of non-discrimination and accessibility of people with disabilities.

The investment projects included in the aid schemes hereof should ensure the necessary conditions to avoid discrimination against vulnerable groups, particularly regarding accessibility to infrastructure, services and goods.

Article 5

Terms and conditions of inclusion

1. Participation of aid beneficiary in the cost of the investment project

The aid beneficiary may participate in the cost of the investment project either through its own resources or by external financing, provided that at least twenty-five percent (25%) of the total investment cost does not contain any State aid, public support or provision (Article 14 para. 14 GBER).

2. Minimum threshold of investment projects

The minimum eligible threshold of investment for inclusion of investment projects in the aid schemes hereof shall be defined by the size of the aid beneficiary, namely:

(a) for large enterprises, in the amount of five hundred thousand (500,000) euros; (b) for medium-sized enterprises, cooperatives and clusters of Article 52, in the amount of two hundred fifty thousand (250,000) euros; (c) for small enterprises, in the amount of one hundred fifty thousand (150,000) euros; (d) for micro enterprises, in the amount of one hundred thousand (100,000) euros;

(e) for the Social Cooperative Enterprises of Law 4019/2011 (Gov. Gaz. 216, Vol. A) and the Agricultural Cooperatives, the Producers Groups and the Rural Partnership of Law 4384/2016 (Gov. Gaz. 78, Vol. A), in the amount of fifty thousand (50,000) euros.

3. Content of investment projects The investment projects falling under the aid schemes hereof should be an initial investment (Article 2 point 49 GBER); in particular, they should meet one of the following conditions: (a) setting-up a new establishment; (b) extension of the capacity of an existing establishment; (c) diversification of the output of an establishment into products not previously produced in the establishment provided that the eligible costs are higher than 200% of the book value of assets used again as recorded in the fiscal year preceding the application for inclusion of the investment project; (d) fundamental change in the overall production process of an existing establishment, provided that the eligible costs exceed the depreciation during the three previous fiscal years of the assets related to the activity, which is to be modernised; (e) an acquisition of assets belonging to an establishment that has closed or would have closed had it not been purchased by an investor unrelated to the seller and excludes sole acquisition of the shares of an undertaking.

Article 8

Eligible costs of regional aids

1. Eligible costs of investment projects for the implementation of aid schemes shall mean the following, under the terms and conditions in the paragraphs below:

(a) capital expenditure in tangible assets;

(b) capital expenditure in intangible assets; (c) the wage cost of new jobs created as a result of the implementation of the investment project, calculated over a period of two (2) years from the creation of each position. The above wage cost shall be eligible cost only separately and not in conjunction with the cases under points (a) and/or (b).

2. The eligible cost is defined as the cost of expenses, which may be reinforced on the basis of EU and national law. The aided cost is defined as the part of the eligible costs, which is ultimately reinforced based on the limits and restrictions hereof.

3. The eligible costs in tangible assets shall be as follows:

(a) The construction, extension and modernisation of building facilities and special and auxiliary facilities of buildings and structures to ensure accessibility for people with disabilities, as well as landscaping. This expenditure cannot cumulatively exceed 45% of the total regional aid eligible costs. This rate stands at 60% for the corresponding expenditure of the investment projects under point (c) of paragraph 4 of Article 7 and 70% for the corresponding expenditure of the investment projects under instance (cc) of point (b) of paragraph 4. The above rate stands at 80% for investment projects carried out in listed buildings.

(b) The purchase of all existing fixed assets (buildings, machinery and other equipment), or part of the assets of a production plant, in the case of an aided SME, directly related to a production facility, provided the following cumulative conditions are met:

(aa) this plant has ceased its operation; (bb) the purchase is made by the operator unrelated to the seller; (cc) the transaction concerned was carried out under normal market conditions; (dd) the machinery and other equipment cannot be older than seven (7) years from the date of first purchase. Where assets have previously received grants or have been subsidised through investment laws or other aid schemes, they shall be excluded from the eligible costs of the submitted investment project.

(c) The purchase and installation of new machinery and other equipment, including technical installations and vehicles moving within the site of the plant being included.

(d) The payments under the leasing of new modern machinery and other equipment whose use is obtained, and provided that the leasing contract provides that ownership of the equipment will pass to the lessee at the end of the contract.

(e) The modernisation expenditure of special facilities (unrelated to buildings) and mechanical installations.

4. The eligible costs in intangible assets shall be as

follows:

(a) transfer of technology through the acquisition of copyrights, licences, patents, know-how or unpatented technical knowledge;

(b) security and quality control systems, certification systems, software procurement and installation and business organisation systems.

The above described expenditure must cumulatively meet the following conditions: (aa) they must be used exclusively in the establishment receiving the aid and must remain associated with the project for which the aid is granted for at least five years or three years in the case of SMEs; (bb) they must be included in the amortisable assets of the undertaking to which the aid is granted;

(cc) they must be purchased under market conditions from third parties unrelated to the buyer.

For large undertakings, eligible costs of intangible assets cannot exceed 50 % of the total eligible costs of the regional aids. For SMEs the maximum rate stands at 75%.

5. Where eligible costs are calculated based on the estimated wage costs from job creation as a result of an investment project, the following conditions must be cumulatively met:

(a) the investment project involves a net increase in the number of workers depicted in the Annual Work Units (AWU) in the establishment and respectively in the undertaking, compared with the AWU for the previous twelve months from the date of submission of the inclusion application; (b) filling all jobs within three (3) years from the date of completion and commissioning of the investment;

(c) each job created by the investment shall be maintained in the region for at least five (5) years for large and medium-sized enterprises and three (3) years for small businesses, from the date of first filling.

6. The following costs are not aided:

(a) the operating costs of the investment; (b) the purchase of passenger cars up to six (6) seats; (c) the purchase of furniture and office furnishings, except as part of the hotel equipment; (d) the purchase of land plots and parcels. In the event of purchase of building facilities, the proportion of the expenditure relating to the value of the land plot, on which they are erected, cannot be aided;

(e) the contribution to the share capital of the value of machinery and other fixed assets; (f) the construction or extension of buildings on land plot not owned by the operator, unless it is granted by the State or institution of the public sector or is leased for this purpose for at least fifteen (15) years from the date of the inclusion decision and has been legally transcribed.

7. Cumulation of aids for the expenditure of this Article with the aids for the expenditure of Article 9 for the same eligible costs is not permitted.

Article 9

(a) costs for obtaining, validating and defending patents and other intangible assets;

(bb) marketing of the cluster to increase participation of new undertakings or organisations and to increase visibility;

(cc) management of the cluster's facilities; organisation of training programmes, workshops and conferences to support knowledge sharing and networking and transnational cooperation.

The operating aid for the operation of innovation clusters may be granted for a period not exceeding ten (10) years.

6. Investment costs for energy efficiency measures (Article 38 GBER). The eligible costs shall be the extra investment costs necessary to achieve the higher level of energy efficiency. Costs not directly associated with a higher energy efficiency level shall not constitute eligible costs. Aid shall not be granted where improvements are undertaken to ensure that undertakings comply with Union standards already adopted, even if they are not yet in force.

7. Investment costs for high-efficiency cogeneration from renewable energy sources (Article 40 GBER). Investment aid is granted only in respect of newly installed or refurbished capacities only.

The eligible costs shall be the extra investment costs for the equipment needed for the installation to operate as a high-efficiency cogeneration installation, compared to conventional electricity or heating installations of the same capacity or the extra investment cost to upgrade to a higher efficiency when an existing installation already meets the high-efficiency threshold. In the case of power plants over 1MW, the eligible costs shall be only those corresponding to heat production used for heating of processes or sites.

Costs not directly associated with a higher level of environmental protection shall not be eligible.

9. Costs for the installation of energy efficient district heating and cooling (Article 46 GBER). The eligible costs for the production plant shall be the extra costs needed for the construction, expansion and refurbishment of one or more generation units to operate as an energy efficient district heating and cooling system, as provided for in Article 3 of Law 4342/2015 (Gov. The eligible costs for the distribution network shall be the investment costs.

10. Costs for remediation of contaminated sites (Article 45 GBER). The eligible costs shall be the costs incurred for the remediation work, less the increase in the value of the land. All expenditure incurred by an undertaking in remediating its site, whether or not such expenditure can be shown as a fixed asset on its balance sheet, may be considered as eligible investment in the case of the remediation of contaminated sites.

11. Any expenditure may be considered eligible only if it relates exclusively to one of the above categories of expenditure.

12. The eligible costs of paragraphs 6-10 of this Article shall be specified by a joint decision of the Ministers of Economy, Development and Tourism and Environment and Energy determining the manner of calculation and arranging any related issue for the implementation of the relevant provisions.

6. The relevant notice may provide for different host agencies of the applications

for inclusion of investment projects and the corresponding threshold of paragraph 2.

Article 14 Evaluation process

A. Stage of completeness and legality check

1. The completeness of the submitted applications and the related supporting documents shall be checked by the competent Agency of paragraph 2 of Article 13, based on standard completeness control system. If the application is rejected on grounds of incompleteness of the file, the applicant shall be informed to the email address stated when registering in the State Aid Information System.

2. Every investment project shall, under penalty of exclusion, comply with the following conditions:

The rejection decision shall be posted on the State Aid Information System and communicated to the project operator by sending it to the email address thereof. The applicant may lodge a complaint against the rejection decision, as defined in Article 15.

If the immediate evaluation process provided for in the following paragraphs is followed, the stage of completeness and legality check shall be completed within twenty (20) days from the date of submission of the application for inclusion.

B. Evaluation stage

1. The evaluation of the application is entrusted to one (1) evaluator, selected from the relevant Registry of Article 24 by random electronic selection via the State Aid Information System. The evaluation shall be carried out either by the method of benchmarking or by the method of direct evaluation, as specified in the relevant decision of notice regarding the aid schemes.

The result of the evaluation shall be checked by the Investment Projects Evaluation Committee, which is established by decision of the competent body of paragraph 7 of this Article and composed of two (2) members of the relevant Agency and one (1) member of the relevant Registry of Evaluators by random electronic selection via the State Aid Information System. To facilitate and speed up the control work of the Committee, the aforementioned competent body may designate special rapporteurs, who are not members

thereof.

2. The process of benchmarking provides an evaluation of all applications meeting the terms and conditions hereof and the notice, based on the following indicative criteria:

(a) financial performance of the operator (indicators of liquidity, leverage, capital efficiency);

In the event of a tie, the investment projects that received the highest marks in most sub-criteria shall precede. In the event of a new tie, the investment projects shall be ranked on the basis of the smallest aided investment cost. The investment projects, based on their ranking in the final table, shall be included in the aid scheme, until the exhaustion of the corresponding budget in the notice.

3. In the process of direct evaluation, an independent evaluation shall be carried out of all legal and timely applications for inclusion, based on the principle of time priority and available resources, and the relevant reasoned decision shall be issued. The applicant may lodge a complaint against the rejection decision under the provisions of Article 15.

4. The decision of notice shall specify the criteria, methodology and evaluation process, setting out the individual evaluation items, the required documentation, the scoring indicators and their weighting, as well as the minimum score the investment project must satisfy, in order to be included in the ranking tables.

5. An Evaluation Guide for Investment Projects shall be issued and published by the Minister of Economy, Development and Tourism, which includes the evaluation methods, standards costs for types of investment projects and other instructions for the proper performance of the evaluation work.

6. The evaluation procedure shall be completed within thirty (30) days of completion of the completeness and legality check, as laid down in paras. 1-4.

7. The investment projects that meet the legal requirements may qualify for the aid schemes hereof by individual inclusion decisions. The bodies responsible for issuing such decisions are:

CHAPTER V IMPLEMENTATION AND COMPLETION OF INVESTMENT PROJECTS

Article 16 Control of investment projects

1. Investment projects under aid schemes shall be checked during their implementation, upon completion and commissioning of the investment and for meeting their long-term obligations. The control may pertain to the documents of the dossier ("administrative control") and/or may consist of on-site control. The administrative control shall be carried out either by the Agency or by an authorised control body, as provided for in paragraph 8. The on-site control shall be carried out exclusively by the above authorised control body.

2. The purpose of the control is:

(a) determining compliance of the operator of the project with the provisions hereof, as well as compliance with the requirements and conditions of the decision of notice and the inclusion;

(b) determining compliance with the long-term obligations.

3. Regular control shall be conducted at the request of the operator of the investment project accompanied by the supporting documents specified in the decision of notice, for the purpose of certifying, by decision of the competent bodies of paragraph 7 of Article 14, that:

(a) the physical and financial subject of the investment has been implemented at least by 50% on the date of filing the request for control, in order to activate the process of payment of the aid, under Article 20, or

(b) the investment project has been completed and the productive operation of the investment has started on the date of filing the request, under Article 19. Costs or other acts performed after the date of filing the request for control shall be taken into account for the completion of the investment

project, without being included in the finalisation of the aided investment cost.

If the information provided with the request for control are not verified by the control body, the penalties of Article 23 shall apply. The verification of the completeness of the request for control by the competent Agency secures for the investment operator absolute priority in the time ranking of requests for control, by aid scheme, for the payment of the aid provided for in Article 20. Derogation from the priority order is permitted for unforeseen or emergency reasons, related to a specific investment project, which would result in undue delay or interruption of the aid payment procedure for the other beneficiaries. The unforeseen and emergency reasons, as well as any other related issue of implementation of this provision shall be determined by decision of the Minister of Development and Tourism.

4. Exceptional control may be carried out whenever necessary by decision of the Agency.

5. Completion of the administrative or on-site control is followed by drafting a relevant report to be submitted to the competent authority through the State Aid Information System.

6. The competent authority shall check the completeness of the control report and the compliance with the conditions of the inclusion decision and take the following actions:

(a) if the control report is complete, it proposes the adoption of the relevant decision;

(b) if it finds minor deficiencies relating either to the control report or to the investment, it orders the presentation of a supplementary control report;

(c) if it finds serious deficiencies in the control report, it orders control anew by a body with a different composition;

(d) if it finds serious deficiencies in the investment, it may propose taking action in accordance with the provisions of Articles 18, 21 and 23.

7. The fee for filing the request for control shall be set at 0.005 of the eligible cost of the project. In any case, the above amount cannot be less than one hundred fifty (150) euros and more than two thousand five hundred (2,500) euros. The fee for filing the request for control of major scale projects of Articles 65-69 shall be set at 0,005 of the cost of the investment project which, in any case, cannot exceed the amount of twenty-five thousand (25,000) euros. The fee for filing a fresh request for control of point (d) of paragraph 6 shall be set at twice the amount specified above. The above amounts may be reviewed by joint decision of the Minister of Economy, Development and Tourism and Finance.

8. The Investment Inspection Bodies hereof are composed of no less than two auditors and established by decision of the competent bodies of paragraph 7 of Article 14. This decision shall set the time and manner of their establishment depending on the type of control, their responsibilities, the number and capacity of the members according to the specific characteristics of the controlled investment, the scope of the control, the time within which they are required to perform the control and deliver their report, and any other detail for implementing the provisions of this Article.

9. The Minister of Economy, Development and Tourism shall issue and publish the Manual of Investment Control, which specifies the method and any other matter relating to the proper execution of the control and the equal treatment of operators of investment projects.

Article 17

Approval of changes after completion

1. The inclusion decision may be amended at the request of the operator of the investment, which may be made submitted throughout the course of the implementation of the investment project until submission of the final request for control. Following the adoption of the completion decision, it is possible to request approval of change of the details of the investment project, which the operator is required to keep until the end of the long-term obligations, as defined in Article 21.

2. Requests to amend, or approve the change in, the details of paragraph 1 shall be submitted with respect to the following:

(a) substantial variations of the physical and financial object or decrease of the investment project capacity;

The above requests shall be accompanied by a reasoning of their feasibility and all supporting documentation, as defined in the decision of notice specifying the conditions and evaluation criteria. The competent Agency shall reply within ninety (90) days of receiving the request. If the Agency accepts the request for amendment, in whole or in part, it will make the relevant recommendation to the body responsible for the amendment of the inclusion decision or the issue of the approval of the change respectively. Otherwise, a reasoned rejection decision is issued, which is communicated to the operator, to the email address stated when registering in the State Aid Information System. A fresh

request of the same operator for

amending the terms of the inclusion decision with the same content shall not be examined on the merits and shall be filed.

5. The inclusion decision may also be amended automatically by the competent authority, if it is found that the terms of the inclusion decision have changed.

6. The amount of the fee for filing the requests of paragraph 1 shall be determined by a joint decision of the Ministers of Economy, Development and Tourism and Finance.

Article 18 Completion of investment projects and commissioning of the investment

1. The investment project shall be completed with the implementation of the physical and financial object and the commissioning of the investment, provided the initial productive operation objectives and the integrated nature of the investment are served, within the period set out in the inclusion decision, which cannot exceed three (3) years from the date of publication of the above decision. The completion and commissioning of the investment shall be certified by decision issued by the competent bodies of Article 14 paragraph 7.

2. (a) The period set out in the inclusion decision for completion of the investment project may be extended once up to two (2) years maximum, provided that the following conditions are cumulatively met:

(aa) Electronic filing of the relevant request before the expiry of the completion period, as set out in the original inclusion decision;

(bb) implementation of 50% of the physical and financial object.

(b) The completion period set out in the inclusion decision may also be extended for reasons of force majeure for a period equal to that of the suspension or delay, provided that the ability of completing the investment project within the new period will be documented.

3. For the certification of the commissioning of the investment, it shall be required to document the operation of the plant, especially by the sale of products or the provision of services and the issue of all authorisation permits.

4. The investor shall file an application electronically through the State Aid Information System to certify completion and commissioning of the investment and for the certification of the implementation of 50% of the physical and financial subject, no later than sixty (60) days from the expiry of the investment's completion period, as defined in Article 19. If the operator of the project does not file the request of the preceding paragraph together with the required supporting documents and within the above period, the investment shall be considered as incomplete. In this case, the inclusion decision shall be revoked and the aid amounts that may have been awarded shall be recovered, as provided for in paragraphs 9 and 10 of Article 23.

5. With the decision of notice setting out the conditions of completion of investment projects.

Article 19 Certification process of completion and

commissioning of the investment

1. The control of completion and commissioning of the investment shall be made upon filing the request of Article 18, in accordance with the procedure of Article 16.

2. The decision of completion and commissioning of the investment shall set out the time of completion of the investment project and the final amount of aid. Time of completion shall mean the actual time for completion of the physical and financial subject, not the time of publication of the inclusion decision.

3. The decision of completion and commissioning of the investment cannot result in the increase of the total aided cost of the investment project or the total amount of aid or the individual aid rates per group of eligible costs, as originally defined in the inclusion decision.

Article 20 Payment of aid

Payment of the aid or use of the benefit by the beneficiary may be performed either once with the issue of the decision of completion and commissioning of the investment project or gradually, provided the conditions in the following paragraphs are met. The amounts of the awarded aid per type of aid shall be determined based on the individual aid rates per group of eligible costs, as defined in the inclusion decision.

1. Tax exemption

(a) The right to start using the benefit of the tax exemption incentive is established with the certification of implementation of 50% of the investment project cost by the competent control body. The operator may use the entire receiving aid of the tax exemption within fifteen (15) tax years from the year of establishing the benefit of use of the benefit, under the following restrictions that apply cumulatively:

(aa) the receiving aid shall not exceed, annually, twenty percent (20%) of the total approved amount of the tax exemption, except in the case of incomplete use in the previous tax years due to lack of adequate profits. In this case, any remaining amount of aid from previous tax years shall be added up to the maximum annual amount of receiving aid, as calculated above;

(bb) the receiving aid shall not exceed fifty percent (50%) of the total approved amount of the tax exemption until the tax year of the issue of the decision on completion and commissioning of the investment.

(b) The amount of the receiving aid of the tax exemption for the part of the equipment of the investment project acquired under a leasing agreement shall be determined for each tax year as a percentage on the part of the purchase price of the equipment, which is included in the rents paid by the end of the tax year.

(c) The yearly spent amount of the tax exemption shall appear on the special reserve and the respective account in the books of the company, formed by the income tax which was not paid because of the provided tax exemption.

(d) The method of calculating the amount of the tax exemption aid for each tax year, any supporting documents required for using the tax benefit, the content of the Statement of Tax Exemption of point (l) of paragraph 3 of Article 21 and any related issue for the implementation of the provisions of this paragraph shall be specified by joint

decision of the Ministers of Economy, Development and Tourism and Finance.

2. Grant

(a) An amount up to fifty percent (50%) of the approved grant may, following relevant request, be paid to the beneficiary after the certification by the competent auditing body of the implementation of the 50% of the total cost of the project.

(b) The remaining amount of the grant, or the entire amount thereof in case point (a) has not been applied, shall be paid after the issue of the decision on completion and commissioning of the investment.

(c) The amounts of the grant shall not be deducted from the value of the investment costs in order to determine the taxable profits.

(d) The grant shall be paid directly by electronic payment to a bank account of the project operator and cannot be assigned to third parties. Exceptionally, it is possible to assign the claim to the amount of the grant to the Banking Institutions for the purpose of providing a short-term loan of an amount equal to the grant assigned for the implementation of the investment project. In these cases, the payment of the grant shall be made directly to the Bank with which the agreement for the assignment of claim has been signed, provided that, each time, at least an equivalent amount to the grant paid will have been withdrawn by this short-term loan.

3. Leasing Subsidy

(a) The commencement of payment of the leasing subsidy may take place after the competent auditing body has certified that all leased equipment has been installed at the plant as provided for in the leasing contract.

(b) The subsidy shall be paid every six months and after each payment of the rent instalments by the investor operator. The amount payable shall be calculated on the equipment acquisition value, which is included in the instalments paid, in accordance with the approved aid rates and with the limitation of not exceeding the payment of sixty percent (60%) of the approved amount until the issue of the decision on completion and commissioning of the investment project.

2. Upon filing the appeal, the competent Receiving

Authority shall inform the applicant on the same day of the hearing date. The hearing shall be fixed: (a) At least twenty (20) days after filing the appeal against a decision rejecting an application for international protection as unfounded under the regular proceedings or withdrawing international protection status; (b) At least ten (10) days after filing the appeal against a decision rejecting an application for international protection with rapid process or as inadmissible under Articles 16 paras. 4 and 18 respectively; (c) At least five (5) days after filing the appeal against a decision rejecting an application for international protection in respect of Article 60 or submitted while the applicant is in a Reception and Identification Centre. The applicant and the Asylum Office may submit any additional information or memo up to and including the day before the hearing of the appeal.

3. If the hearing process of the appeal consists of oral hearing, the Appeals Authority shall call the applicant before the competent Independent Appeals Authority.
